# Don't get left behind.

Hi Tim,

**65% of customers have already upgraded to smart meters.** Don't miss out on your opportunity to help us reduce our nation's carbon emissions and create a more sustainable future.

Smart meters are the foundation to a smarter energy system. The information they give us will help us to use more renewable power, such as wind, solar and hydro power, and reduce our reliance on fossil fuels.

**Over 28 million** smart meters have been installed in the UK so far, now it's your turn!

**Don't get left behind, click the button below to**

## schedule your appointment:

### Book your Smart appointment

We're offering a [choice of gifts\\*](#) to all our customers when they have smart meters installed successfully. You can choose between a free Costa Coffee eGift or opt to have a tree planted in your name with our partner, the charity One Tree Planted.

Visit our [Smart page](#) for more information on smart meters.

Any way we can help we will,

### The E.ON Next team

If you don't want smart meters at this time, please call on **0808 501 5200** and let us know.

## Have we hit the nail on the head?

Nailed it

Can't decide

Not really

What else do I need to know?

When we fit your meters we follow the Smart Meter Installation Code of Practice. This is a set of rules that suppliers must agree to when they're installing smart meters for their customers. To see what this means, just visit [ecportal.co.uk/smicop](http://ecportal.co.uk/smicop). For more information about smart meters and for advice on how to save energy, visit [eonnex.com/smart](http://eonnex.com/smart)

\*65% of E.On Next customers who are eligible to have a smart meter fitted have had one or more installed already.
